Executive Summary

The Union Council Based Poverty Reduction Programme (UCBPRP) is a pioneering initiative of the Government of Sindh (GoS), for reducing poverty by tapping into the potential of the people. The UCBPRP, being implemented by the Sindh Rural Support Organisation (SRSO), was initiated on February 1, 2009 in two 2 districts of Sindh, namely Kashmore-Kandhkot and Shikarpur, with a total outlay of Rs. 2.9 billion, during a period of 30 months (FYs 2008-09, 2009-10 & 2010-11).

1. The UCBPRP aims at improving the quality of life of the rural communities specifically that of the poorest of the poor, through the conceptual package of social mobilisation of the Rural Support Programmes (RSPs). This entails organising rural communities into "organisations of the poor" at the community, village and union council level. At the heart of the social mobilisation approach is the belief that there is an innate ability in each individual to improve his / her quality of life. However, what sets the poorest apart is the fact that they are not able to tap into their inherent potential. Social mobilisation is the first step in eradicating some of the barriers that the poorest face. In the case of UCBPRP, it caters towards removing common hurdles such as lack of assets, credit and technical skills which ultimately prevent the poorest from climbing up the poverty ladder.

2. The characteristics of the UCBPRP are:

- Targeting of the Poorest: The fundamental basis of the UCBPRP is to alleviate poverty. Therefore, success of the project lies in its ability to target and include the poorest into the main fray. To this end, SRSO has used the Poverty Scorecard (PSC), developed by the World Bank and adopted by Planning Commission of Pakistan. The PSC uses 13 easily verifiable questions to evaluate the poverty levels of a household. PSC has the ability to categorise entire union councils and districts into different poverty bands [Bands are: 0-11 Extremely Poor / Destitute, 12-18 Chronically Poor, 19-23 Transitory Poor, 24-100 Non Poor] making it easier to distinguish products for each band. In the UCBPRP, the PSC has been used to identify those poor households which are ordinarily excluded from social welfare initiatives. The purpose is to provide them the products included in the project.
- Identification of the Poor: One of the first activities in the UCBPRP, the PSC Survey identified and categorised a total of 257,988 households in both districts in February 2009. In District Kashmore-Kandhkot, 54,871 of those households fell into the three lowest bands of the poor (0-11 Extremely Poor / Destitute, 12-18 Chronically Poor, 19-23 Transitory Poor). Likewise in District Shikarpur, 49,468 of the total households fell into the three bands of the poor. Therefore, on the whole both districts have 104,339 poor households in the three lowest bands (0-23); around 40% of the total population. Further bifurcating these households into the three lowest poverty bands separately; 17,220 households are Extremely poor (0-11), 39,321 are Chronically poor (12-18) and 47,798 households are Transitory poor (19-23).

During the PSC survey, some villages were not able to be covered due to two fundamental reasons; prevalence of a poor law and order situation and the lack of interest/doubts of some households. For this reason, in June, SRSO decided to conduct the PSC survey of the missing households. As of June 31st, a total of 3,697

missing households in both districts, have had their PSC survey carried out. Out of these households, 2,360 households have been identified as belonging to the lowest three poverty bands.

• Social Mobilisation: In the UCBPRP, communities in both target districts are being organised at Paro / Mohallo level into Community Organisations (CO) and at the village level into Village Organisations (VOs). By having their own organisations, the communities (especially the poorest) will be able to present themselves in a unified manner and will have the ability to voice their developmental concerns to the relevant authorities / bodies, such as Provincial and District Governments, Taluko and Union Administrations and SRSO, etc. Eventually, it is envisaged that these VOs will be able to develop their own linkages with external organisations in order to cater for their needs. At the same time, by managing their own organisations, the confidence and skills of these communities will be greatly enhanced. SRSO envisages that in these two 2 districts, 84,000 households will be organised into 4,200 VOs.

The social mobilisation process started in March 2009 which consisted of team building and orientation/training of both PIU Head Office staff and of field staff, along with organising households. In April, Programme Introductions started in the 2 districts, followed by formation of VOs. In May, formation of VOs continued however Micro Investment Plans and resolutions had started to be developed in the VOs formed the previous month.

As of the end of June, a total of 46,492 households have been organised into 945 VOs. Households organised have increased by 208% since March 2009, while VOs have increased by 89%.

As always, most of the households organised come from the lowest 3 bands of the poverty bands while *all* members of VOs are women.

In addition to this, for the VOs which have been formed, trainings have been taking place continuously for the capacity building of the office-bearers of the VOs. In May 2009, a total of 984 office-bearers have been trained in 4 types of VO capacity building trainings.

As of June 2009, 1,529 office-bearers have been trained in the 2 districts of Kashmore-Kandhkot and Shikarpur.

- **Products**: UCBPRP includes the following products for the poorest households:
 - o *Income Generating Grants (In Kind / Non-Cash)*: These are grants for the women of extremely poor households, for the purpose of increasing their incomes. Each eligible household receives a grant (in-kind) of up to Rs. 20,000 for purchasing income-generating assets / livestock such as goats, cows, buffaloes, etc.

The distribution of grants started in June 2009, whereas identification of the poorest women had taken place in the previous month. In May, 2,023 women had been found to be eligible for the grant, according to the PSC.

As of June, a total of Rs. 7,193,400 grant amount has been distributed to 180 VOs in both districts. 960 women (with PSC ranging from 0-11) have received grants in the 2 districts. Most of the grants have been used to purchase livestock.

Small Loans from the Community Investment Fund (CIF): Each VO will be given a revolving fund for providing small / flexible loans to poor women only. The amount of the fund that each VO receives depends on the number of chronically poor households with a maximum of Rs. 25,000 allocated per household. The distinguishing aspect of the CIF is that the fund will be managed by the village women themselves, as they will be the ones who decide which poor woman should receive a loan and at what flexible terms.

CIF operations started in May 2009, with 90 VOs receiving a CIF fund of a total of Rs. 17.389 million. In addition to this, 4,578 women from PSC 0-18 were identified from the 2 districts.

In June 2009, 314 VOs received a total of Rs. 65,333,700 of CIF funds. 4,982 poorest women have been given CIF loans for various purposes, such as for livestock, enterprise and for agriculture.

Scholarships for Vocational Training: The UCBPRP includes a component whereby youth from extremely poor and chronically poor households will be identified and provided scholarships for receiving vocational training. The type of training provided will depend on assessments conducted during consultations between the individuals, their household and the VO.

In April 2009, 172 participants were trained in various vocational skills such as fridge repair, AC repair, motorcycle repair, etc in the Vocational Training Education Centre (VTEC) in Islamabad.

In May 2009, 382 participants, of which 87 were women, were trained in numerous vocational skills. They acquired these trainings at various training centres such as VTEC and the Vocational Training Centre in Jindodero, District Shikarpur.

In June, 1,306 people were trained; of which 431 were women. As of June 2009, 1,860 participants have been trained (1,342 men and 518 women) in 14 trades. They have acquired their trainings at additional locations as new training centres in Ghari Yaseen, District Shikarpur and Ghaus-pur, District Kashmore-Kandhkot were opened and in operation in the month of June.

Our Model of the CPI will be sourced from extremely poor and chronically poor households of the village, with market-based wages being provided.

The initiation of CPIs started in May 2009, as it was much more beneficial if the newly formed VOs had time to be acclimatised to themselves being organised and for them to obtain their various VO capacity building trainings. Therefore in May, 73 schemes were identified (40 for safe drinking water schemes and 23 for sanitation schemes). Identification of the schemes was done through the VO's identifying their needs and writing a resolution which was received by SRSO's field units.

As of June 2009, 195 CPIs were surveyed (65 CPIs in District Kashmore-Kandhkot and 130 in District Shikarpur). Out of those 27 have been completed and 110 are currently in process.

As a result of the completed CPIs, a total of 6,736 households have benefitted; of which 3,401 belong to the lowest 3 poverty bands. In addition to this, the completed CPIs have produced 916 man-days of employement. Rs. 183,200 have been distributed in wages to those employed; all of which come from the poorest households as defined by the PSC.

4. Since the 1st of February 2009, SRSO has been taking leaps and bounds in implementing the UCBPRP efficiently and effectively. As of June 31, 2009, the performance of the programme has been tabulated, as shown in Annex 1.

1. The Union Council Based Poverty Reduction Programme through RSPs

The Union Council Based Poverty Reduction Programme (UCBPRP) has been designed as an answer to alleviating the poverty of targeted communities of the poorest in rural Sindh, through bespoke developmental packages. It aims to reduce the common hurdles faced by the poorest of households by tapping into their inherent potential. In an unprecedented move, the Government of Sindh (GoS) has approved Rs. 2.9 billion for initiating the UCBPRP in the 2 districts of Kashmore-Kandhkot and Shikarpur, for a period of 30 months. The start of the partnership between Sindh Rural Support Organisation (SRSO), the programme-implementing organisation, and the Government of Sindh regarding the UCBPRP came about after a presentation of the programme by Mr. Shoaib Sultan Khan, Chairman SRSO to President Asif Ali Zardari and to Syed Qaim Ali Shah, Chief Minister Sindh. The programme was greatly appreciated and upon its merits, 2 districts of Sindh were approved for the UCBPRP.

The programme is being implemented by SRSO using the Rural Support Programmes' (RSPs) conceptual package of social mobilisation. The success of the social mobilisation approach lies in its intrinsic belief that *permanent* development can only take place when it is carried out through organised communities themselves. In addition to this, the social mobilisation approach has the ability to empower the poorest of households by building their capacity to collectively plan and initiate the development of their households, their villages and union council.

2. Features of the UCBPRP

The foundation of the UCBPRP lies in its ability to identify and target the poorest for provision of vital products for improving their quality of life. These are products such as income-generating grants, flexible community-based microcredit, vocational trainings and micro-insurance. The task of identifying, targeting the poorest and providing them with this whole range of products has been taken up by SRSO through its cadre of specialised staff.

2.1 The UCBPRP Team

In order to implement this remarkable programme, SRSO has established a complete team for the purpose; both at the field and Head Office levels.

Field Level

The UCBPRP has 14 Social Mobilisation Units; 7 units in Shikarpur and 7 in Kashmore-Kandhkot. Each unit comprises of a Unit in-charge and a Social Mobilisation Team (SMT). The SMT in turn consists of 3 Social Organisers (SOs) (2 female and 1 male) and a MIS officer; with 4 support staff (admin/finance assistant, driver, office-boy and a security guard).

Field Level Team Structure

Head Office Level

At the Head Office level, SRSO has established a Project Implementation Unit (PIU) for managing, monitoring and reporting the project and its various activities. The UCBPRP is under the immediate supervision of the Team Leader who reports directly to the Chief Executive Officer (CEO) of SRSO. The PIU consists of 9 sectors, as shown in Figure 3¹.

Head Office Level PIU Structure

The Monitoring and Evaluation (M&E) section plays an important role as all data and information coming from the field and between the different sectors goes through M&E. In addition to this, the Team Leader relies on the M&E section to filter, verify and cross-verify all data and information coming from the 2 districts; pertaining to the different sections of the UCBPRP project. The flow of information in the UCBPRP PIU project can be seen from the diagram shown below:

_

¹ For details on M&E monitoring procedures, see Annex 2

2.2 Poverty Scorecard

Being the unique programme that it is, the UCBPRP rests its entire rational on being able to identify the poorest; thereby directing its products exclusively for this overwhelmingly neglected group. In order to carry this out, SRSO has taken the initiative of using the Poverty Scorecard (PSC) to identify its target group.

The PSC is a tool for measuring levels of household poverty, which originally was developed by the Grameen Foundation USA and by Dr. Mark Schreiner, a Senior Scholar at the Centre for Social Development at the Washington University in St. Louis, America. The need for the PSC arose when it was increasingly felt, especially from the field, that the poorest of households were being left out. Questions such as: who are the poor, how many poor households are there, where do they live started to emerge; thus leading to the development of the PSC. The PSC has now been adopted by the World Bank, after some minor

modifications (to include urban households as well). This modified version of the PSC is now being used by the World Bank, Asian Development Bank (ADB) and the Planning Commission, Government of Pakistan for its various development programmes in Pakistan. SRSO also used the modified PSC for its survey in the UDBPRP.

The PSC itself is a single-page form consisting of 13 questions, which when filled out is able to determine the level of poverty of a particular household. The 13 questions relate to issues such as facilities present in the household (type of toilet, drinking water supply, etc) and of the assets owned by the household (livestock, land, etc), amongst other indicators (all of which are physically verifiable). These questions were derived from the mammoth indicators present in the 2001 Pakistan Integrated Household Survey. The particular combination of the 13 questions has the ability to accurately (with a 90% confidence rate) assign a household a poverty score, ranging from 0 to 100 (with 0 being extremely poor and 100 being non-poor). In addition to this, the PSC because of its score-system is able to determine which poverty band a household falls into. As shown in Table 2, in the UCBPRP, the PSC scores have been split into 4 poverty bands²:

PSC Poverty Bands	PSC Score Range
Extremely poor/destitute	0-11
Chronically poor	12-18
Transitory poor	19-23
Non-poor	24-100

PSC Poverty Bands

Benefits of the Poverty Scorecard

What is unique about the PSC is its ability to *objectively* track the poverty levels of *each and every* household in a union council. It also is a "blind" survey as both the enumerator and the respondent household have no way of interpreting the results of the PSC form; thus reducing chances of inaccurate information. In addition to this, the PSC is also able to produce poverty related data which can be easily comparable to other union councils across Pakistan (something not possible in the orthodox Participatory Rural Appraisal (PRA) method). Other benefits of the PSC include:

- It identifies households which are asset-less and own no land of their own
- It provides real time households census data
- It provides real time poverty data for individual households
- It can identify households that do not have any salaried member within the household
- It can identify households that have not been registered and issued Computerised National Identity Cards (CNICs)
- It can identify the number of school age children not enrolled in schools and thus help develop appropriate educational facilities for providing education for all
- It can identify the number of households that do not have potable drinking water and toilet facilities, as well as identify villages that need infrastructure in terms of drinking water supply schemes and sanitation facilities
- It can identify and quantify households which can be eligible for being a beneficiary of specialised poverty-targeted schemes such as the Benazir Income Support Programme (BISP), Benazir Youth Development Programme (BYDP) the People's Housing Cell and *Zakat*

² These poverty bands have been divided according to the World Bank as well as SRSO's experience of conducting the PSC survey in more than 10 districts.

• It assists in developing both Village Development Plans (VDPs) and Union Council Development Plans (UDPs)

Identifying the Poorest in the UCBPRP

In the UCBPRP, SRSO made the PSC survey their first task. Special teams were formed for carrying out the PSC survey in the 2 districts. These special teams consisted of skilled staff from the various RSPs across Pakistan who worked side by side with SRSO's own staff, in helping to conduct a door-to-door survey. A credit to their kind, this selfless gesture of facilitation and support, is something found only in the RSPs.

There were a total of 44 PSC teams, each consisting of 14 individuals. These 14 individuals included a team leader, a supervisor, 2 data entry operators and 10 enumerators (in addition to a 5 member "back-up" enumerator team). Details of each member's responsibilities and profile can be seen from Table 2:

Position	Terms of Responsibility	No. present in each team
Team Leader	RSP Professional, trained in PSC, s/he checks all PSC forms, entries and reports	1
Field Supervisor	RSP Professional, trained in PSC, s/he monitors & coordinates field operations	1
Enumerators	At least matriculate, age above 20, male and female, fills a maximum of 35 PSC forms/day	10
Data Entry Operators	Account/office Assistants, with good computer skills, enters 250 PSC forms/day	2

Team Composition and Responsibilities

The process of the PSC survey, as carried out by SRSO began with:

- Formation of its PSC teams and their training. Each team and its members were given a 4 day orientation and training on the need for the PSC, its origins, the implementation process of the PSC and on the form itself.
- The teams were then placed in the 2 districts with the team leaders and supervisors assigning each enumerator with their route map for conducting the household PSC survey.
- The enumerators visited each household on their route, filling out the PSC form with adult members of the household (while physically verifying responses)
- At the end of each day, the enumerators would hand in their filled forms to their supervisor and team leader; who would then check all the PSC forms to make sure that they were filled in completely. Any incomplete forms would be returned to the enumerator and be asked to re-visit the household within the next 2 days.
- Additional monitoring would also take place in the form of on-the-spot field checking, while at the Head Office level, PSC forms would be re-checked on a sample-basis.
- Checked PSC forms would be given to the data entry operators who would enter the information into the PSC MIS

 An additional team of 15 individuals produced PSC reports on each union council in the 2 districts, extracted from consolidated lists of households of each village from the PSC MIS.

All in all, it took a total of 450 people, 50 vehicles and 80 computers to conduct the PSC survey in which 257,988 households were surveyed in the 2 districts of Kashmore-Kandhkot and Shikarpur.

Poverty Scorecard Results

The PSC teams in SRSO managed to complete the PSC survey of the households³ in the 2 districts in a record time of 28 days. On average, each union council was completed in merely 12 days. This included not just filling out the form, but also monitoring and checking it, entering it into the MIS and developing reports on each union council. Having completed this gargantuan exercise, the poverty profile of Districts Kashmore-Kandhkot and Shikarpur can be seen in the following table and figures:

District	Type (Rural/Urban)	No. of UCs	Score Range (0-11)	Score Range (12-18)	Score Range (19-23)	Score Range (24-100)	Total
Kashmore-	Total	50	10,083	20,513	24,275	79,310	134,181
Kandhkot	%		8%	15%	18%	59%	100%
Shikarpur	Total	37	7,137	18,808	23,523	74,339	123,807
	%		6%	15%	19%	60%	100%

PSC Results of UCBPRP Districts

District Kashmore-Kandhkot PSC Results

District Shikarpur PSC Results

In addition to the PSC survey which took place in February 2009, SRSO is carrying out the PSC survey of those households which were missed in February. The reasons for having missing households were twofold. Firstly because of the decreasing law and order situation in rural Sindh, the PSC survey teams could not enter some Union Councils. Therefore, regrettably the teams could not survey those households. The second reason for having missing households was because of the lack of interest from some of the households. At the time of the survey, the PSC teams were denied access to some of the households, either because of those households being ultra-conservative or because some households flatly refused to take part in the project.

Both of these reasons are now changing. The UCBPRP team has been constantly receiving requests from those missing households, to ask them to come and to conduct their PSC survey. The reason for this change has been because the households have seen the benefits which their neighbours and community members have been receiving from the UCBPRP project. In addition to this, in places were there was a poor law and order situation,

³ Some households were missed during the survey due to the law and order security situation and because of the lack of interest of some households.

communities themselves have guaranteed protection to the UCBPRP teams, for them to come to their villages to organise their households into VOs.

The process of identifying and visiting these households is the following:

- 2 teams, one for each district, have been especially made consisting of a total of 7 SRSO MIS staff members.
- These teams visit each unit office to ask the SOs about which villages have missing households.
- Having had a list of those villages, the PSC team goes to the village to talk to the village elder. With the help of the village elders, a village dialogue takes place where the community is told of the PSC survey and its benefits. The village elder then asks those households which have not had their PSC survey done (due to either lack of interest or law and order situation) to come forward and to identify themselves.
- Representatives from those households come forward and the team then verifies whether they indeed have been left out from the PSC survey (by checking their PSC households lists).
- Once checked, if a household has truly been left out, the teams visit those households with the household representative. It is at this point that their NIC number is also noted (if there is one present).
- Once the survey has been done, the team returns to the PIU and punches in the data into the MIS, resulting in its score being calculated and being added to the list of households.

Details of the process of including the missing PSC households can be seen from the Flow Chart shown below:

Flow Chart

On average, it takes the team 3-5 hours per village (depending on the number of missing households as some villages had been entirely missed due to security reasons). As a result of this, the team is able to complete 2 villages per day.

The 2 teams have been working since mid-June and have already carried out the PSC survey for 3,697 households; 2,308 in District Kashmore-Kandhkot and 1,389 in District Shikarpur. The following table includes the breakdown of these missing households into the different poverty bands:

	No. of Union Councils	Total Missing HHs	PSC Poverty Bands				
District			Extremely Poor (0-11)	Chronically Poor (12-18)	Transitory Poor (19-23)	Non-poor (24-100)	
Kashmore - Kandhkot	9	2,308	463	642	479	724	
Shikarpur	11	1,389	248	261	267	613	
Total	20	3,697	711	903	746	1,337	

Details of Missing PSC Households covered in June 2009

2.3 Social Mobilisation

Social mobilisation has been used extensively as a way to achieve sustainable development for the masses. It does this by bringing communities together in order to better achieve their common-goals and to meet their needs. At the heart of social mobilisation lies the belief that every individual, be they poor or rich, man or woman, has the capability and potential to carry out activities for their benefit and that of their families.

SRSO has implemented the UCBPRP using the social mobilisation approach to organise rural communities in order to provide the poorest with essential products, while at the same time building their capacities to plan and work as a whole.

As an unparalleled step, SRSO has decided to focus only on women in the households and to organise them into women's VOs. Therefore as an added precaution, SRSO has ensured that the chief beneficiaries of the UCBPRP are truly the most deserving in each of the target poor households, i.e. the women.

The Social Mobilisation Process in the UCBPRP

The social mobilisation process in the UCBPRP, implemented by SRSO was the following:

- Plans were developed at the PIU level, in consultation with the field level teams regarding the social mobilisation plan of the 2 districts.
- Having divided areas amongst the field teams, situation analysis of the villages was carried out (in addition to the PSC survey results).
- Village level programme introduction dialogues took place by senior staff of the SRSO team, as well as by senior management such as the Chairman and CEO of SRSO. In these dialogues, SRSO as an organisation was introduced to the communities and on the social mobilisation approach and its numerous successful outcomes both in and around Pakistan. In addition to this, these dialogues also introduced the UCBPRP, its target group and the products of the programme.
- With the acceptance and cooperation of the communities, activists were identified from within the communities themselves. These activists or Community Resources Persons (CRPs) are individuals who assist the SMTs in organising communities from within their own village and from surrounding villages.
- The process of organising communities into VOs took place whereby interested households (and 100% of the poorest 'target' households) signed up for being a part of their VO, through joining their community level organisations, i.e. Community Organisations (COs).

• Once households from the village formed the VO, elections took place where the women themselves selected which women would become their office-bearers (such as Chairperson, Treasurer and General Secretary).

As seen from the above-mentioned, the social mobilisation process involves the organisations of households at 2 levels; at the community or neighbourhood level and at the village level into VOs. Mentioned in the table below, are the roles of COs and VOs:

Role of COs, VDOs and LSO				
СО	VO			
Needs assessment at household level and planning (micro investment plans)	Monitoring/supervising COs and their records, attendance and savings			
Savings mobilisation	Verifying the results of the Poverty Scorecard of the households in the village			
Credit identification and appraisal	Identification of activities at village level with COs			
Ensuring utilisation of credit	Develop a village development plan with its COs			
Inclusion of non-members into the CO; especially the poorest and women	Provide assistance to COs in implementation of development activities like CPIs			
Identification of members for trainings and its utilisation	Mobilise local resources and ensure their fair distribution across its COs			
Reporting to VO on activities	Reporting to LSO on activities and situation of COs			

Role of COs and VOs

Having mobilised the target and additional households, candidates for VO capacity-building trainings (such as VO Management Training) are being selected, with trainings continuously taking place.

Community Resource Persons

As mentioned before, CRPs are local activists of the village who volunteer to help the SMTs in the social mobilisation process. They are individuals who are both active and committed to the development of their area. Specifically, they believe in bringing about betterment through their own initiatives and hard work. CRPs are hired on a short-term basis by their VOs, or in the case of the UCBPRP, CRPs work under and report to SRSO's SMTs. Before starting any work, the SMT makes sure to check the background and reputation of the CRP; to ensure that

they are respected and trustworthy in the eyes of their village. The chief responsibility of these CRPs is to organise households into a village assembly, which the SMT verifies and then forms a VO. The CRP also ensures that timely meetings take place of the VOs and its community/neighbourhood level gatherings. This is all recorded and reported to the SMT. The roles of the SMT and CRPs are further defined in the following table:

Role and responsibilities of CRPs	Role and responsibilities of the SMT
Formation of new male/female COs	Developing SM work plan for the CRP.
(naturally female CRPs should form	Physically visiting newly formed COs and
women's COs and vice-versa for male	verifying them
CRPs)	
Reactivation of dormant COs	Verifying and approving reactivated COs
Attending meetings of COs in order to help	Verifying attendance of CRP in meetings
the SMT in monitoring of CO meetings; in	
terms of the attendance of their meetings,	
regularity of savings and maintenance and	
record of their registers (for the contract	
period)	
Submission of monthly reports to the	Conducting village dialogues in order to
respective organisation (CO,VDO,LSO)	form VDOs; using CRP as an aide
(for the contract period)	
Training community members in basic SM;	Monitoring/supervising reports of CRPs
under supervision of SMT (for the contract	given to their respective organisation
period)	
	Training CRPs in SM and supervising their
	trainings to community members
	Physically verifying progress/work of CRP
	for honorarium (if any), by visiting the
	COs

Roles and Responsibilities of SMT and CRPs

Progress

The social mobilisation process in the UCBPRP project was initiated in March when the PIU team at the head office and the field unit staff were given an orientation on the UCBPRP project and trainings.

Actual social mobilisation in the field started towards the end of May and in April, when field unit staff members started visiting the target villages in the 2 districts. The field staff

conducted village dialogues with the communities and informed them about SRSO and the UCBPRP project. Formation of VOs took place thereafter with willing and committed community members. With the help of the PSC household lists, SRSO field staff was able to ensure that the poorest of the poor women were included into VOs. Having formed VOs and facilitated elections of VO office-bearers, field staff also helped the VOs in opening their bank accounts.

In May, the social mobilisation process continued but with the additional activity of ensuring that the MIPs of the VO members were filled in correctly. As the MIPs would be the basis for determining whether a member requires a particular product, it was vitally necessary to ensure that these were filled in correctly. In May, field staff was also receiving resolutions from the VOs on various activities and decisions that they required.

In June, along with previous social mobilisation activities continuing, the field staff also had to monitor the appraisal forms being filled out for the processing of CIF loans and grants. In June, the following social mobilisation progress has taken place:

- 10,056 households have been organised; 4,611 in District Kashmore-Kandhkot and 5,445 households in District Shikarpur
- 215 VOs have been formed; 107 of those have been in District Kashmore-Kandhkot while 108 have been formed in District Shikarpur

Up to June 31, 2009, SRSO mobilised a total of 46,492 households in both Districts with 32,493 of those households being organised in District Shikarpur. The organised households have are now members of 945 VOs. From the following table, the social mobilisation progress made in the month of June can be seen against the monthly targets:

	Kashmore-Kandhkot		Shikarpur		Total	
	Households VOs		Households VOs		Households VOs	
	Organised	Formed	Organised	Formed	Organised	Formed
Target	1,702	84	2,300	116	4,002	200
Achieved	4,611	107	5,445	108	10,056	215
% Achieved	271%	127%	237%	93%	251%	107%

Social Mobilisation Targets and Achievements in Districts Kashmore-Kandhkot and Shikarpur in June 2009

Story of Mr. Shafique Rehman Jamro

Mr. Shafique, SRSO Social Organiser

Mr. Shafique Rehman Jamro is 27 years old and has been working with RSPs since the last 3 years. He has a DVM, LLB and a MBA & MA in Sociology from the University of Sindh. Currently he is working with SRSO in its Union Council Based Poverty Reduction Programme in District Kashmore-Kandhkot.

Mr. Shafique has turned out to be outstanding in his work and targeted activities. He managed to form 57 Village Organisations (VO) and 199 Community Organisations (CO) in the month of May 2009. Alongside him, there were 8 Community Resource Persons (CRPs) working; 2 of which were women CRPs.

When asked about how he achieved his targets, Mr. Shafique replied with confidence and said that he would not have been able to achieve his targets without the active participation of the CRPs. He shared that his commitment as a development professional becomes stronger and stronger when he sees the life of misery of the poorest. Mr. Shafique added that he is confident that the commitment of the Sindh Government and the dedication of SRSO (in the form of the UCBPRP) would bring a visible difference in the lives of the people of Kashmore-Kandhkot.

Mr. Shafique also negates the common perception that people have of the people of the tribal ridden areas of Kashmore-Kandhkot; that human life is not safe and secure. He shared some of his interesting experiences while working for the communities, such as local people of the area providing him and other staff members with security on a voluntarily basis; all for the cause of the development of their area.

Jannat, the CRP

Jannat with her Husband

Jannat in Front of her House

Jannat Mangi, 45, is the Chairperson of VO Jam Sooharo Chachar in village Jam Sooharo Chachar, Union Council Haibat, District Kashmore-Kandhkot. Jannat is primary-pass and has 10 children of which 6 are girls. All of her children are married, except for 2 sons who she now lives with. Due to her husband's old age, her 2 unmarried sons now support her.

In addition to being the Chairperson of her VO, Jannat also has volunteered to work as a Community Resource Person (CRP) in order to help the women of her village to get organised. In such a society where women are excluded from every aspect of life, this woman has played a vital role in motivating women in her Union Council. Jannat says, "In a male dominant society, it is so difficult to work for women, but I do not fear or hesitate about negative remarks given by the male members of the community. Instead, I have organised households of 9 villages into 9 VOs of UC Haibat, in the month of May 2009".

When asked how she became a CRP, Jannat narrates that she had once been elected as a lady Councillor at the Union Council level and that experience of struggling for the equity of rural women gave her reason to continue for the same struggle even after her term was over.

Jannat heard about the UCBPRP project through one of SRSO's Social Organisers. She offered her services as a CRP immediately and started spreading the message of the project. Jannat says that by working as a CRP "SRSO has given me a chance to work towards my objective of working for women's equity and for their skill enhancement. I think this objective will be achieved in the near future".

Najam, the CRP

Najam, CRP from Village Sheralabad

Najam din, 25, works as a Community Resource Person (CRP) helping SRSO's field staff. He is Intermediate-pass and from village Sheralabad in Union Council Haibat, District Kashmore-Kandhkot. Najam is married and has 2 young children. Previously Najam worked in a Basic Health Unit (BHU) in his village, however he was dismissed unfairly due to the whims of an influential person.

Najam first heard about the UCBPRP project from Mr. Rafiq, a SRSO Social Organiser. He told Najam about the purpose and objectives of the project by the Government of Sindh and SRSO.

Najam's main motivation for becoming a CRP is so that he can make a change in the rural areas. He started work from his own village where he organised the women of the village into a Village Organisation. Najam talks of his work as a CRP and of how he goes door to door to spread the message of the UCBPRP project. He said that in the beginning, he was mostly criticised by villagers. They would always say that how could they allow their women to form an organisation. It was a great challenge for him but Najam continued to motivate women to organise themselves; something which he has now achieved.

He is inspired by the UCBPRP project and of the way SRSO is working at the grassroots. He said that "This is an organisation which gives poor villagers an opportunity to make decisions for their own destiny".

2.4 Products of the UCBPRP

The UCBPRP has an entire range of specialised products in order to ensure that *effective* development takes place for the poorest of the poor. The following are the products being provided in the programme:

2.4.1 Non-Cash Income Generating Grants

A product for the poorest of the poor households in the 2 districts, the non-cash income generating grant is the first step in helping households to stand on their own feet. Exclusively for women, the grants provided are for the purpose of income generating assets such as livestock and productive tools and inputs (such as a sewing machine, seeds, etc). The grant amount for the UCBPRP has been calculated at a maximum of Rs. 20,000 per household, for the duration of the programme.

The process for distributing these grants is that each targeted household develops a Micro Investment Plan (MIP), with the help of the SMT. The MIP is a simple form in which the SMT list down the present socio-economic situation of the household (such as their household income and expenditure details). The MIP also has details regarding the plan that the household wants to carry out, concerning income-generating activities and trainings that they require for increasing their incomes. In the case of grants, interested households (who fall in the PSC category of 0-11) express their wish of receiving a grant to their VO, in addition to it being stated in their MIP. The VO members approve those members who qualify for the grant and write a resolution to their local SMT. The SMT, upon receiving the resolution, verify the approved candidates by filling out their PSC forms a second time. In addition to this, the SMT also checks their MIPs and verifies through a consultation with the candidate and her household, whether a grant can actually cater towards her plan. Having done this, the SMT approves the final list of grant candidates and purchases their incomegenerating asset. As an added monitoring measure, at the time of distribution, a sample of the households will be verified again by the Income Generating Grants (IGG) section, at the PIU level.

The process of IGG/CIF can be seen from the flow chart shown below:

Flow chart of CIF & IGG

Verification of Potential members through PSC/MIP by VO /SRSO

Funds transfer to VO Bank Account

Disbursement by VO (individual Cheques)

Purchasing committee for IGG (VO, SO and Recipient)

Record keeping @ VO Level (Book Keeper)

Individual Recovery Installments (Receipt issued by VO)

Progress

In the UCBPRP project, the distribution of the grants has only just taken place this month. In the previous months of March and April, the identification of those households falling within the PSC score range for grants was carried out by SRSO staff, with the help of CRPs. In May, the MIPs of those women requiring grants were developed.

By following and completing the above steps, in June SRSO provided 960 grants to women in the poorest households; 195 in District Kashmore-Kandhkot and 765 in District Shikarpur. These women were from 180 VOs 25 Union Councils in both Districts of Kashmore-Kandhkot and Shikarpur. The total grant amount distributed has been Rs. 7,193,400. Most of the grants have been used to purchase livestock as this is an activity which the poorest of women feel the most comfortable with.

Habiban – Grant Recipient

Habiban with her Daughters

Habiban with her Son and her Sheep

Habiban, 35, PSC 6, belongs to village Aliabad in Union Council Nim Sharief, Taluka Ghari Yaseen, District Shikarpur. 10 years ago, her husband left her and their 6 children, to fend for themselves. 4 of those children are daughters; the eldest child being 21 and the youngest child being 10 years old.

The UCBPRP team visited her village 2 months ago and organised 43 households out of a total of 60 households into a Village Organisation. Habiban is the one of 31 households who fall in the 0-23 PSC range; i.e. into the poorest category. Despite Habiban being very poor, her VO still unanimously elected her to be their treasurer. This was primarily due to her reputation of being an honest, kind and intelligent woman in her village.

Habiban's request for a grant, to purchase sheep, was also accepted by her VO after her MIP had been developed and her grant request had been brought forward in her VO meeting. Her VO decided to give her a grant of Rs. 16,000, with which they bought her 4 female sheep (one of which had a baby lamb as well). Since her VO realised the extent of her poverty, they made it clear that Habiban would not have to repay this grant amount.

Habiban is now a happy woman demonstrated by the way her eyes light up when she proudly and eagerly shows her newly acquired sheep. She conveys that she feels more secure knowing that she has a worthwhile investment with her at home. Habiban knows exactly what she wants to do with her investment. After her sheep have reproduced (which happens every 6 months), she plans on fattening the male sheep and selling them off. She estimates that she would get about Rs. 6,000 per male sheep. In addition to this, Habiban would hold on to the female sheep, which naturally over time will continue to increase. Habiban, being granted a hefty investment, has already calculated that, in the least, her 4 female sheep will produce 2 lambs (one male and one female) each year, i.e. a total of 8 lambs (4 female and 4 male). This means that per year, by selling 4 fattened male sheep at Rs. 6,000 each, Habiban would earn Rs. 24,000. Considering that the fodder for her sheep is free, Habiban's earnings would be mostly profit. In addition to this, Habiban's flock of sheep would also increase by 4 sheep each year.

Realising the above, Habiban is now looking forward to bringing a positive change in her family's life.

2.4.2 Community Investment Fund

In order to effectively and efficiently reach out to women and the poorest segments of the rural community, the Rural Support Programmes Network (RSPN) and SRSO began a programme called the Community Investment Fund (CIF). The CIF is a programme which increases the confidence and empowerment of the poorest of rural women by providing them access to flexible micro loans.

The roots of CIF go back to the concept of the Village Organisation Bank (VOB) that the Aga Khan Rural Support Programme (AKRSP) had initiated in the Northern Areas of Pakistan in the 1980s. More recently, the Society for Elimination of Rural Poverty (SERP) in Andhra Pradesh, India, in the late 1990s, organised only the poorest of women into their community-based groups. As the programme gathered momentum and built up successfully, these community-based organisations federated at the village, union council *and* district level. Currently, there are over 10 million members (all women) who are organised into 35,525 VOs, in all 22 rural districts of the state of Andhra Pradesh. These VOs with their CIF fund, which has rotated over a period of several years, has produced a total CIF fund of nearly Rs. 9 billion⁴.

Combining previous experiences and initial lessons learnt from new initiatives, RSPN has modified the CIF product in the context of Pakistan. It views CIF as a cost-effective method of providing microfinance services to the poor and poorest women, in areas which are relatively underserved by the MFIs. CIF is a fund which is run and managed by the poor and poorest women in their own organizations, i.e. by its own beneficiaries. In addition to providing them with flexible microfinance, members accessing CIF are also encouraged to mobilise and increase their own savings, using it to eventually build up their fund for internal lending purposes. What makes CIF unique from regular microfinance is its ability to increase the levels of empowerment, confidence and skills of the beneficiary women, as it leaves the majority of the decision-making roles in their hands.

In the UCBPR, the CIF amount has been calculated at Rs. 25,000 per household. The procedure for the CIF starts again with the household's MIP. Those households which fall into the category of Chronically Poor (12-18) and require a flexible micro-loan request for a loan in their VO meeting. The VO jointly decides which women should receive a CIF loan and at what terms, for e.g. at what service charge, for what duration and with which repayment plan. Having approved the list of candidates, the VO sends a resolution to the SMT. The SMT then conducts its own verification process in which it re-fills the PSC form of the said households and checks their MIPs to determine whether the household's plans can be helped with a CIF loan. In addition to this, because the CIF has to be repaid, the SMT also has to check the income-expenditure pattern of the household (from their MIP) to determine whether the household would be able to easily repay the instalments of the CIF. Responsible appraisal of candidates is a must for ensuring that the targeted beneficiary households do not fall into a cycle of debt and despair. After the final appraisal and before sending the approved CIF list to the VO, a sample of the candidates are verified by the PIU, as an added precaution. Having completed the verification process, the list of approved candidates is sent to the VO. The VO then releases the CIF money to its members. Regarding repayment of CIF, according to each borrower's repayment plan, she would repay her loan to her VO. The service charge amount would be added to the CIF fund, thereby ensuring that the fund continues growing.

-

⁴ SERP: "Statistical Details of SERP 2008-2009"

Progress

The identification process started in March and April, when the PSC results had been calculated and reported. In May, 90 of the VOs had their CIF fund amounts transferred to their bank accounts; amounting to Rs. 17.389 million. In addition to this, each VO had to take a CIF management training, in order to access their CIF funds and to distribute them to the women. Having done so and by the VDOs going through the appraisal and voting process, appraisals for CIF loans were received by SRSO at the end of May.

The actual disbursement of the CIF loans started in the month of June with a total of 314 VOs. These VOs received a total of Rs. 65,333,700 of CIF funds into their bank accounts⁵. From these funds, 4,982 CIF loans have been distributed to the poorest of women.

-

⁵ For details of 262 VOs and their CIF Fund Amounts, see Annex 3

Bhaul and her Goats

Bhaul with her Children and Goats

Bhaul, 40, PSC 15, lives in Sahta, Union Council Jindodero, District Shikarpur. She is married to Mughal Sahto, 45, currently unemployed due to his severe asthma. Together they have 8 children, 6 of which are girls. Their eldest child is 21 years old, while the youngest is 3. Until recently Bhaul and her family had no means of supporting themselves as her husband was unemployed.

Bhaul received a CIF loan of Rs. 10,000 after becoming a member of her VO. She heard about the UCBPRP project through SRSO's Social Organiser, Ms. Reema. Bhaul recalls that when she first heard about the project, she had no doubts whatsoever because of the positive and caring way Ms. Reema interacted with her.

When asked about how her experience was of receiving her CIF loan, Bhaul answers that she found it very encouraging that poor people were being given such a huge advantage by the Government of Sindh and SRSO. She explained that she approached her VO members in their monthly meeting and requested for a CIF loan. Bhaul was very clear in stating that she wanted to purchase livestock with her loan. Having filled her appraisal form in the VO meeting, her VO discussed her case. After voting and approving her case, Bhaul was given a Rs. 10,000 loan (out of which Rs. 500 was cut in order to be put back into the village's CIF fund to increase it). With her VO, she decided on taking a one year loan which she would pay in lumpsum towards the end of the year. With her loan, she purchased 4 goats which she plans on fattening and selling. Furthermore, Bhaul says that if she gets a good price for her goats, she would purchase a young cow.

Bhaul is very glad of her loan and feels proud that because of her, her family now has a good start in terms of livestock. In addition to this, Bhaul's husband is now busy taking care of the goats.

Fareeda - Masso Khan Machi's New School Teacher

Fareeda with her Students

Fareeda, 22, PSC 16, has become a role model for women in her village and even to women outside of Sindh. Fareeda is a mother of 4, living in village Maso Khan Machi, Union Council Sultankot, District Shikarpur.

Fareeda's tragic story started when her husband got paralysed. Her in-laws kicked them out of their house stating that they were now a burden on them. Fareeda thereafter had to live in a make-shift shack with her family. When she heard about SRSO and its work or organising the poorest, she immediately became a member of her the VO in her village. Having become a member, Fareeda also received a CIF loan which she repaid completely. This was because with her loan she decided to open a small shop, operating from her home. With her CIF loan, Fareeda was able to stand up on her own two feet and support her husband and their children. Fareeda because of her hard work also had the opportunity to go to Islamabad and share her experience in the Rural Support Programmes Network's workshop on "Alternative Financial Intermediation for the Poor", held on the 16th of June 2009.

However Fareeda's accomplishments do not end there. Her VO in the course of its meetings had devised a village development plan on which they had listed the development activities which they required as a whole. Second on their list was the need for a female teacher. Maso Khan Machi had a boys' school but none for girls; thereby forcing them to remain uneducated. As a result of the VO and being brought closer, members realised that Fareeda could become their village's school teacher. Fareeda was educated till the 8th grade and gladly took up the offer. The entire village, through its VO, decided that each of the village's 88 households would contribute Rs. 20 to pay for Fareeda's salary as a school teacher.

Fareeda now teaches primary level education to over 50 girls from 8am to 1pm in her home. At the moment, Fareeda teaches boys as well as their own school has their summer holidays. One of the problems facing Fareeda and her students is that of a lack of supplies, Fareeda's students do not all have books and copies but that has not stopped them. They continue to come to school with a lot of zeal, eager to share each other's books and copies.

Fareeda realises that she could never have reached this far, had it not been for her VO and the CIF loan that they had given her. She feels extremely proud to be helping other girls in her village to realise their talents. Fareeda also knows that it was because of her hard work that members of her village realised her potential to educate their girls.

Fareeda's VO continues to support her and is planning on contacting different organisations and the local government for providing the girls of Maso Khan Machi with basic school supplies.

2.4.3 Human Resource Development

An important aspect of the UCBPRP is the investment being made into increasing the incomegenerating skills of the poorest, especially of the youth. Numerous studies have pointed out to the benefits and impact that a skilled labour force has, not just at the micro and meso levels, but also at the macro level. For a very poor household, the impact is extremely significant as it is the difference between one ageing hand feeding several mouths and several hands feeding considerably less mouths.

Computer Software Training in VTEC Sukkur

In order to instil these highly sought-after skills within poor households (with a PSC score ranging from 0-18), SRSO has outsourced this section of the UCBPRP to the National Rural Support Programme's Institute of Rural Management (NRSP-IRM). IRM because of its considerable experience in the field of training has managed to successfully build up a cadre of highly specialised trainers in rural development; perhaps the only one of its kind in Pakistan.

Machine Embroidery Training in VST Centre, UC Jindodero, District Shikarpur

In the UCBPRP, the process of identification and providing these trainings is done by both SRSO's field teams and IRM. At the Village Assembly, the SMT after explaining the vocational trainings and capacity building trainings, asks those households falling within the PSC range of 0-18, whether they would want to send a young adult (male or female) from their household for vocational training. The SMT notes down the name of the VO member, their PSC score, child's name and contact details. This information is then passed onto IRM who then sends its assessment teams who initiate a Training Need Identification

(TNI) and Training Need Assessment (TNA) of those poor households and of their nominated child. This is done by filling out the PSC form for the said households. They also assess which trade the child should train in and whether the child has the capacity to utilise the specific type of vocational training and whether both parents are in agreement to send their child for vocational training.

Having done this, the assessment team either approves or rejects the candidate. Those approved are either sent to Islamabad (for trades not found in Sukkur), Sukkur (for those trades which have training opportunities present in Sukkur) or to local District level training centres (especially for females who were not able to travel far). IRM's procedures can be seen from the flow chart shown below:

Progress

In the UCBPRP, IRM has developed both vocational and VO capacity building training packages which at the moment are being delivered to the organised communities in both districts. IRM's achievements in both setting their office and training centres, in addition to training cadres of trainers, women and youth has been exceptional.

IRM having established its office in Sukkur, started with its work by going into the field and

Motorcycle Repair Training in VTEC Sukkur

conducting vocational skills training needs assessment and identification; after the PSC teams had surveyed and produced PSC reports of all the households in the 2 districts.

As a result of the training needs assessment and identification, IRM sent its first batch of 172 youth for vocational skills training to Islamabad in the month of April. In addition to this, in April the first batch of 5 trainers (all from Sindh) were sent to IRM's Head Office in Islamabad to be trained in how to conduct VO capacity building trainings.

In May, IRM established its Vocational Training Centre (VTECH) in Sukkur and one of its vocational training centres for women in Union Council Jindodero, District Shikarpur. Having done so, the first batch of women candidates (87 women) for vocational training obtained their skills in various trades from the Jindodero Training centre in May. Various resource persons were employed for training both men and women; however as a requirement, locals from the area (specialising in each trade) were chosen. This was done in order to ensure that local talent was being utilised correctly and being promoted through the UCBPRP project. On average, each resource person receives Rs. 7,000-9,000 per month for their services in delivering trainings in the UCBPRP project, on a contractual basis.

In the month of May, IRM also initiated its trainings for VO capacity building, split into 4 different types of modules which consist of the following modules:

- VO Capacity Building Training
- VO Planning Training
- VO CIF Training
- VO Book-Keeping Training

Each training consists of 2 days, in which VO Presidents, Treasurers and Book-Keepers are shown how to manage and record the transactions of the VOs. In order to ensure the comfort of the community, IRM provides these trainings in the field itself; choosing centrally located

and neutral locations which are accessible to all. Furthermore, to avoid any burden on the community members, all participants are provided with a pick/drop service to and from the training centres/locations.

A total of 984 VO members were trained in how to manage their VOs, keep records and on how to correctly utilise CIF funds, etc. In addition to this, the second batch of trainers was sent to IRM, Islamabad for training and first-hand experience of conducting VO capacity building trainings.

Students Learning in the new Training Centre in District Kashmore-Kandhkot

In June, the training component of the UCBPRP project has resulted in⁶:

- Opening of the District Kashmore-Kandhkot Training Centre for women
- Opening of the Ghari Yaseen, District Shikarpur Training Centre for women
- Training of a total of 1,306 people were trained; of which 642 are from District Kashmore-Kandhkot and 664 from District Shikarpur.
- Training of 875 men in 12 trades; 493 men from District Kashmore-Kandhkot and 382 from District Shikarpur
- Training of 431 women in 3 trades; 149 from District Kashmore-Kandhkot and 282 from District Shikarpur
- Training of 1,359 VO members in VO capacity building
- Employment of 15 local female resource persons for vocational training

_

⁶ For detailed lists of vocational skills participants, see Annex 4

• Employment of 8 local male resource persons for vocational training

Progress of the VO Management trainings can be seen from the following table:

	Type of			
District	Training	Targets	Achievement	%
	VO CB	170	160	94%
Vl	VO Planning	170	70	41%
Kashmore- Kandhkot	VO CIF	170	153	90%
Kanunkot	VO BK	170	41	24%
	Total	680	424	62%
	VO CB	230	294	128%
	VO Planning	230	319	139%
Shikarpur	VO CIF	230	205	89%
	VO BK	230	117	51%
	Total	920	935	102%
Sub Total		1,600	1,359	85%

Table 1: Targets and Achievements of VO Management Trainings in June 2009

The progress made as of June 2009, can be seen from the following graphs⁷:

⁷ For overall details of participants trained in VST, as of June 2009, see Annex 5

Shabnam, the Beautician

Shabnam (centre) with her Mother and Sister-in-Law

Shabnam, 20, PSC 8, lives with her elder brother, his wife and 7 other siblings in UC Madeji, District Shikarpur. Shabnam completed her Bsc (Bachelor of Science) this year, with a lot of problems. This was due to the fact that Shabnam is an orphan and the only source of income of the household is what her elder brother earns. Her brother is a Rickshaw driver and finds it hard to meet the expenditures of his own family and that of his siblings; especially with the high rate of inflation.

From a very young age, Shabnam has always wanted to help her brother in supporting the household. However due to her being a girl, she was never allowed to go out and work.

Shabnam heard about the introduction of the UCBPRP project and its vocational skills trainings through Mr. Khwaja M. Tariq, Principal VTEC. She chose the trade of beautician because it was her dream to become a beautician. In addition to this, it was also one of those trades which could be managed and run from her house, with good profits.

After completing her training, Shabnam has not been able to start her work completely. This is because of a lack of money, as it takes at least Rs. 10,000 to carry out all the beauty services that a beautician ordinarily provides. However she continues to provide services such as giving haircuts and setting eyebrows. For each eyebrow setting, Shabnam earns Rs. 20-25. So far she has carried out 20 eyebrow settings for the women in her village, earning her Rs. 500. In addition to this, Shabnam has also made up a bride in her neighbourhood; but at free of cost because she did not have the accessories used in making a bride up. Despite this, Shabnam is very happy because her work was really very appreciated by the people of her village.

Shabnam is an extremely dedicated girl, shown by her energy and enthusiasm in continuing to fulfill her dream. She plans on opening her beauty parlour after getting a micro loan.

Village Organisation Capacity Building Training – 3rd June 2009

On a hot summer's afternoon in Dhakan Town, Union Council ???, District Shikarpur, sitting in a room were a group of 25 women, *all* listening attentively to a lady standing at the front of the room next to a white-board. These women were the Presidents and Treasurers of various Village Organisations (VOs). They had all come to attend a 2 day training, arranged by SRSO and IRM-NRSP, on how to manage their VOs efficiently. The training was being given by an IRM-NRSP trainer.

On observing these women in their training, one could not help but notice the comfortable environment in the room; something representative of the relationship between the trainer and the VO office-bearers. There was an active and easy interaction between the students and their trainer, with the majority of women asking questions, clarifications and

Participants of a VO Capacity Building Training in UC Dhakan

suggestions regarding their VOs and their management. It was clear to see that the students present were eager to understand and implement the contents of the training in their own individual VOs.

The training itself consisted of various topics, such as the importance of having a group sit in a circle; on the necessity, benefit and method of writing a VO resolution; the importance of consistently checking and appraising loan applicants through understanding their current economic situation, etc.

Mentioned below are *some* of the kinds of individuals who make it possible for such a training to take place:

The Trainer

Musarrat with her students

Musarrat Moneer, 27, is from Piralo, Sukkur. She is a trainer in the UCBPRP project specialising in VO capacity building trainings. Musarrat was sent to IRM-NRSP's Head Office in Islamabad in April 2009, for a total of 15 days. In those 15 days, Musarrat was given a 5 day Training of Trainers (ToT) and spent 10 days in attachment with one of IRM's experienced trainers, for a first-hand training experience. Previously, Musarrat was working as a SO in SRSO in Taluka Roree, since 2008. In this capacity, she had given numerous trainings to Community Organisations (COs) and discovered she had a real drive for delivering them. This resulted in her joining the UCBPRP project in a position specialising in training.

Musarrat has delivered 4 trainings so far and faces a busy schedule of trainings ahead of her, as a total of 21,000 people have to be trained during the duration of the project.

However Musarrat is relishing in the challenge and thoroughly enjoys her work. She was very content and said that she faced no problems as such. Although she did admit to having to spend a little extra time with elderly women; as it took them a little longer to grasp the topics. This was due to the fact that most of them were uneducated. Nevertheless, she found the younger participants a great help, in addition to the CRPs. Musarrat was unwavering in her praise of CRPs. She said that the CRPs of the area helped in informing the participants, gathering them for the training event, helping out in the arrangements of the training, such as overseeing food and water distribution, supplies required for the training room, etc.

The Student

Sayin at the VO training

Sayin, 68, is the President of VO Aligarh Chaand, UC Dhakan. She is married to Sadeeq, 75. Together they have an 18 year old son who is matric-pass. Both husband and wife carry out agriculture work on their landlord's lands.

Sayin was elected by her VO members a month ago and was therefore nominated to attend the VO capacity building training. Although Sayin is uneducated, that has not stopped her from understanding the training. She said that "one does not need to be educated to understand concepts; rather one needs to be intelligent".

Through the discussions in the class and the use of teaming an educated participant with a non-educated participant, Sayin has been able to grasp the training and how she could manage her VO.

Sayin confessed that at first she did not trust the project and the visiting SRSO teams. However her trust was gained after she heard that trainings were being held for office-bearers and likewise vocational trainings for the poorest members. She proudly revealed evidence of her trust; in the form of her savings, amounting to Rs. 1,500, safely kept with her community organisation.

Sayin was also happy to be a part of the training group itself. She said that she knew some of the women present but had enjoyed getting to know women from other villages.

Lastly, Sayin said that the first thing she would do upon completing the training would be to tell all the members of the VO about what she had learnt. She would also implement the methods and procedures for managing VOs in her own VO; with the help of her Treasurer, Farzana; who was also present in the training.

Mr. Azam: a community member with a consciousness

The Community Member

Mohammad Azam is an Agriculture Officer working for the Government of Sindh in Shikarpur. His contribution to the poor women of the villages in Union Council Dhakan has truly been noteworthy. 2 months ago, Mr. Azam heard that SRSO and IRM-NRSP were looking for accommodation where they could provide VO capacity building trainings for women in a comfortable and safe environment. Mr. Azam offered to give the 2 room house near his own house for this purpose; *free* of cost.

When asked why he did such a thing, Mr. Azam replied that "I had heard of the project and realised that it truly had benefits for the poorest members of the communities and decided to contribute in whatever way I could".

The first training had already taken place on his property, with many more scheduled in the future.

2.4.4 Community Physical Infrastructures

Community Physical Infrastructures (CPIs) are development infrastructure projects which are carried out with the help of organised communities. These are projects such as installation of handpumps, maintenance of small local roads, etc. In the RSPs, CPIs are carried out on an 80%-20% ratio. The organised community identifies a CPI to carry out in their neighbourhood or village and are meant to contribute to 20% of the cost of the project. However this 20% is usually provided in the form of the community's labour in the CPI.

Hand-pump in Village Chhutto Odho, UC Mohd. Panah, District Shikarpur

In the UCBPRP, CPIs will be provided to 2,100 Mond. Panah, District Shikarpur villages (i.e. 50% of the villages in the 2 districts), for exclusively improving the sanitation situation and drinking water supplies in the selected villages. Each CPI has been calculated at Rs. 250,000. These CPIs are different from the RSP version, as the organised communities will not have to provide any funds towards the CPI. In fact, it is the programme which will provide "Food for labour" wages for *only* those labourers from households with a PSC score ranging from 0-18. As a result, these CPIs will not only improve the village, but will also provide much-needed employment for extremely poor and chronically poor households.

The process for implementing the CPIs in the UCBPRP is that the VO would identify a potential CPI in consultation with its members. They would then send a resolution to the SMT who upon receiving it would send a SRSO Field Engineer to the VO. After assessing the situation, the Field Engineer (from PIU) would design a CPI catering to the needs of the VO (for sanitation and drinking water supply). The proposal would be submitted to the Team Leader who would approve or reject it. If approved, work on the CPI would commence. PSC scores of the labourers wanting to work in the CPI would be verified by the SMT, by filling out their PSC forms again. Wages for labour supplied would be provided from the VO account. The flow-chart mentioned below demonstrates the mechanism of SRSO's engineers in regard to surveying and implementing CPIs⁸:

⁸ For detailed explanation of the CPI Flow Chart, see Annex 6

Progress

The initiation of CPIs in the UCBPRP project was delayed due to the overall delays in the project. Since it takes time for the formation of VOs and for the members to get familiar with their meetings and record-keeping, SRSO could not progress with CPIs.

As a result, the first proposals for CPIs were received in May (a total of 73 proposals were sent to SRSO from various VOs).

The majority of work regarding CPIs was initiated in June. This included:

Construction of Sanitation Drain in Village Sahita, UC Jindodero, District Shikarpur

- 218 CPIs being identified by the VOs through resolutions to the field units
- 195 CPIs being surveyed by SRSO's engineers; carrying out both social and technical surveys
- 110 CPIs being initiated and which are still in process
- 27 CPIs have been completed; of which 5 are in District Kashmore-Kandhkot and 22 in District Shikarpur

As a result of the above mentioned CPIs, it has generated the following benefits for the communities of districts Kashmore-Kandhkot and Shikarpur:

- 6,736 households have and will be benefited from both the completed CPIs and those still in progress
- The completed CPIs have resulted in 916 man-days of unskilled employment (all of which have used individuals from the poorest of households (local to the villages), according to the PSC). Rs. 183,200 has already been distributed to those individuals for the work carried out.
- A total of 164 man-days of skilled employment has been used in the completed CPIs; individuals all local to Sukkur and its surrounding areas. Rs. 65,600 has been distributed to them.
- Those CPIs which are still in progress have resulted in 2,562 man-days of unskilled employment so far. Rs. 512,400 has been distributed those individuals.
- 442 man-days of skilled employment has been generated from those CPIs still in progress. They have been distributed Rs. 176,800 of wages for their work.

The progress made regarding CPIs can also be seen from the following tables:

Drinking water supply schemes

S.No	Activity	Shikarpur	Kashmore-	Total

Safe Drinking Water for Kashmir

Kashmir's Hand-pump

Kashmir is a 45 year old lady and is a member of Village Organisation (VO) Qabalo in Union Council Bhambhir. Union Council Bhambhir is 8 km away from Ghari Yaseen Town in District Shikarpur. Kashmir is married to Abdul Majeed Rajar, a farmer who works in the fields to earn the household's livelihood. Together they have 10 children, out of them 5 are girls. Ever since Kashmir got married, she has been working in the fields. She and her family live in a small hut, which is owned by Kashmir herself.

Like other poor women of rural Sindh, her fate could not bring any fortune for her family as they were deprived from several basic facilities required for survival. One of those basic facilities which Kashmir and her family lacked was that of safe drinking water. It had remained a dream of her family for a long time.

It was April 2009, when a team from UCBPRP visited her village for organising households into a VO. Kashmir became a member of this newly formed VO. Not surprisingly, when she heard about the programme which included several development activities, including safe drinking water schemes, she approached the Chairperson of her VO and the other members to ask for a hand-pump. Having discussed it in the VO's meeting, the Chairperson of the VO received a resolution and submitted it to the Social Mobilisation Unit; with approval from the General Body of the VO.

Within a week, Kashmir had a hand-pump installed in her house. Not only has this provided Kashmir and her family with safe drinking water around the clock, but it has also made her confident in herself that she can and is able to fight against poverty, in order to eradicate it.

3. UCBPRP Events and Visits

Not surprisingly, there has already been immense interest generated because of the UCBPRP, resulting in various organisations coming to visit the project districts. The following section details various events and visits which took place in June, 2009:

Meeting with DCO Kashmore-Kandhkot

A monthly progress review meeting was conducted with DCO Kashmore –Kandhkot on June 8, 2009. Dr. Sono Khanghrani, CEO SRSO, along with members of the UCBPRP team and the Executive District Officers, including the District Coordination Officer, participated in the meeting.

CEO SRSO presented the progress of the last month, i.e. of May. This caught the interest of the District administration who shared their plans to go into the field to see the implementation of the UCBPRP project. The DCO suggested that the UCBPRP project should appoint new teams with urban mobilisation skills, for working in towns. DCO Kashmore also suggested that local female staff should be hired which would help in ensuring the greater implementation of the project, along with more market linkages for youth trained in vocational skills through the project. The DCO informed the UCBPRP team that the District administration would gladly provide any support or facilitation as this initiative by the Sindh Government required special attention in each and every aspect.

CEO SRSO also shared that the Sindh Government intends to initiate a programme for girls' education within the programme area. In this programme, exisiting furnished buildings, which house boys' schools, would be used for providing girls' education in the evening. DCO Kashmore and his team extended their support in this regard, if required.

The meeting ended with the finalisation of the next progress review meeting, which has been fixed for the 8th of July, 2009.

Meeting with DCO Shikarpur

UCBPRP team with DCO Shikarpur

A progress review meeting of the UCBPRP project was conducted with DCO Shikarpur by Dr. Ghulam Rasool Samejo, Team leader UCBPRP along with his core team on June 20, 2009. Since the new DCO, Dr. Saeed Ahmed Mangnejo had just assumed his office, the UCBPRP team briefed him on the project. They went into the different components of the project and of the new techniques being used for identifying the poorest, i.e. the Poverty Scorecard.

DCO Shikarpur was then briefed on the progress achieved in the month of May in the UCBPRP

project. As a result, DCO Shikarpur said that he would visit the project areas to see the programme. The meeting ended with DCO Shikarpur thanking the UCBPRP team for coming to see him and orienting him on the project. The next progress review meeting was arranged for the next month, on the same date⁹.

_

⁹ For analysis of all meetings, including DCO, weekly and monthly meetings, see Annex 7

NRSP's Survey on Education in District Shikarpur

NRSP, on the instructions of the Government of Sindh, conducted a survey in June 2009 on the state of education in 2 Union Councils of District Shikarpur; Union Council Dhakan (peri-urban) in Talukha Ghari Yaseen and Union Council Zarkhail (entirely rural) in Taluka Khanpur.

The primary objectives of the study were to determine the total numbers of school-age children, identify functioning and non-functioning schools and to assess current enrollment and actual attendance levels. In addition, the study utilised detailed qualitative surveys of parents to identify reasons and obstacles for children not being enrolled in or not attending school. Local teachers were also surveyed in workshop settings to assess their training and capacity building needs. The fieldwork was carried out over a 10 day period by experienced NRSP staff; working closely alongside local community activists. All were trained in a series of data collection and data analysis protocols, resulting in legitimate and strongly compelling findings for the region.

The most salient baseline findings include an abysmally low overall literacy rate of 6.8%, a median household income of Rs. 2,500 per month and a total school-age enrollment rate of only 14.4%. Perhaps most significant is the finding that of 58 settlements surveyed, only 20 have functional schools and of these less than half are in satisfactory condition. Furthermore, not a single female-only school was found to be functional.

The lack of functional schools does not by itself explain the exceptionally low rates of attendance. Nor does a family's economic condition – as the vast majority of community members are impoverished tenant farmers, yet only 28% of parents reported poverty/child labor as the primary reason for non-attendance. 72% of parents reported that educational quality and policies (pedagogy and facilities) were the primary reasons for not sending their children to school.

These findings provide a clear rationale for several significant policy recommendations. Most importantly, new teacher training and certification systems must be developed in order to build both the capacity and responsibilities of teachers and school staff. Non-functional schools cannot be made operational through improved facilities alone, though major repairs must be made immediately. Teachers and school administrators must be both empowered and held accountable for the success or failure of their students. The trust of parents and local community members can then be firmly established through the efforts of dedicated and competent teachers. Only then will public sector schools move toward proper functioning, increased enrollment, and sustained community participation.

Taluka Garhi Yaseen as a Showcase:

Taluka Garhi Yaseen has been taken up as a Showcase, following the guidelines given by the Steering Committee for the UCBPRP by the Sindh Government. The Committee said that SRSO should first focus on District Shikarpur and make it into a showcase in terms of social mobilisation. Having done this, work in District Kashmore-Kandhkot should be accelerated. By April, 2009, 14 teams had been formed; each consisting of 2 female and 1 male SO (along with support staff). These teams are under the direct supervision of Dr. Ghulam Rasool Samejo, Team Leader. Nearly the entire Taluka has been organised into community and village level organisations.

4. Project Planning for July 2009¹⁰

According to the modified PC-1 targets, the July 2009 targets have been planned. The PIU team makes their targets according to the PC-1's quarterly targets but also by keeping in mind the overall achievement of the project's targets. In June, half of the SMTs worked in District Shikarpur, while the other worked in District Kashmore-Kandhkot (specifically Taluka Kandhkot). This is so that any remaining social mobilisation targets would be covered effectively, in addition to programme interventions such as CIF and income generating grants. The 7 SMTs in District Kashmore-Kandhkot would learn from the field experiences of the SMTs in District Shikarpur. In July, work in District Kashmore-Kandhkot has already started to catch up with District Shikarpur. July will see field units in both districts striving to achieve targets of the next quarter.

5. Issues to Learn From

Having completed 6 months of the UCBPRP project, experiences from both the PIU level and from the field have led to several questions and subsequently lessons being learnt from them:

• Analysis of Data: The UCBPRP teams in the field units have been carrying out an immense amount of social mobilisation work and activities relating to poverty-focused products. As a result of all this work, a huge amount of data has been generated that is present both at the PIU level and at the field level. This relates to data such as households organised, COs formed, VOs formed, in which Union Councils, how many CIF loans have disbursed, etc. However during these six months, what has fallen short is the level of analysis of the said data. For example, when it comes to MIPs, the number of MIPs from each field unit is known; however analysis of what development activity is requested the most is not known immediately. Similarly, for CIF the amount and number of loans distributed Union Council-wise is known. What is lacking is the purpose of CIF loans; i.e. what percentage has been taken out for livestock purposes, for agriculture, etc.

For both these issues, SRSO has felt the need for a better MIS which would ensure that the data being generated from the field is entered in accurately and is able to be compiled at the PIU level. As a result, in July a MIS will be developed which would be able to cater towards the needs of the UCBPRP project so that numerous kinds of reports can be generated which could give an accurate analysis of the products being used. In addition to this, the MIS also has to be compatible with the PSC MIS; thereby

_

¹⁰ For more details on planning for July, please see Annex 8

giving an accurate picture of the poverty profile of those using UCBPRP's products as well as their saving habits.

- Missing role of COs: The RSPs' social mobilisation approach consists of organising households into smaller, more personal, Community Organisations (COs) at the neighbourhood level. Those COs are then federated at the village level into Village Organisations (VOs). In the UCBPRP project, SRSO has followed the approach of the RSPs and is forming both COs and VOs. However, at this point in time, what is noticeable is the fact that the role of COs seems to be diminishing. This has happened because of the following reasons:
 - o There is no mention of COs in the PC-1
 - As a result, no trainings have been scheduled for the CO itself (although this is
 offset by the fact that the VO trainings are attended by nominees of the CO
 which are voted into the VO)
 - o Because targets are based on VO formation, staff time is also taken up by focusing on the VO level rather than at the CO level

Furthermore, because of the above-mentioned, one of the basic functions of a CO is not being carried out entirely, i.e. savings. The levels of savings in the COs in the 2 districts are low with not much attention being given in this regard, to build the capital of the poorest; through their own resources. Rather, more focus is being put on distributing the products of the UCBPRP project.

Having realised this, July will see a more focussed approach to the foundation of the social mobilisation approach, in addition to focusing on the products of the project. In particular, social mobilisation activities will include the promotion of savings by the poorest of women, wherever possible.

- Strategy for Urban Areas: The UCBPRP project has been focussing on the rural poor in the 2 districts. However there are urban areas and peri-urban areas present as well. These areas require a strategy which is different to the one being used for rural areas. As yet, because the focus has all been on the rural areas, a plan for the urban areas is lacking. As more of the rural areas get covered, SRSO will be shifting more of its attention to the urban areas and therefore will be devising a plan for these unique areas.
- Synergy between the UCBPRP project and SRSO: The UCBPRP, being one of SRSO's numerous projects, is no doubt an initiative on a massive scale. However at this point, towards the end of the first financial year, there have been on real synergies between the UCBPRP project and SRSO or its other projects. For example, SRSO's Enterprise Section has initiated extremely creative products and projects for women in SRSO's rural areas of operation; including a project of the Commonwealth. However, up till now, no attempt has been made to link SRSO's Enterprise Section to the UCBPRP project. At a preliminary stage of future-planning, the Enterprise Section can be used to train UCBPRP's target population of the poorest of women with highend specialised skills (both in terms of quality and prospective income).

Likewise, SRSO also has a project called the FALAH project which promotes birth-spacing amongst the communities of both rural and urban areas. In the UCBPRP project, FALAH activities can be linked with the communities of the 2 districts in order to pass on these lessons for an improved standard of living of the poorest. Similarly, SRSO is also initiating the Landless Hari project and the Low Cost Housing Scheme and UNICEF's project on Lady Health Volunteers and health

awareness; all of which can be targeted towards the communities in the UCBPRP districts.

- <u>Linkages with Government Line Agencies</u>: The UCBPRP project, being a joint initiative of the Government of Sindh and SRSO has yet to develop some linkages with the government line departments. As the government is the provider or basic facilities such as health and education, it is the best outlet for providing these services. As yet a strategy still has to be developed between the Government of Sindh and the UCBPRP project.
- <u>Communications Strategy:</u> One of the essential activities missing in the implementation of the UCBPRP project is that of the role of communications. In this era of technology, the media can play a massive role on the promotion and publicity of a project such as the UCBPRP. Since the initiation of the project, not much time has been spent in trying to come up with a communications strategy for promoting the project amongst the residents of the 2 districts; but also to promote it nation-wide. The month of July sees such an opportunity for the project and therefore a strategy will be thought out for promoting the efforts and achievements of the UCBPRP project.

Annex - 2

UCBPRP Monitoring and Evaluation Section PIU Procedure

Monitoring sector UCBPRP receives progress through two ways; direct from Social Mobilisation Units and from UCBPRP core sectors as well. Social Mobilisation Units (SMUs) send information on a daily basis while core sectors share their progress on weekly basis. M&E sector has developed a mechanism through which SMUs' data can be verified with the data shared by core team, and the data also may be cross verified at field monitoring with the support of poverty score card results. M&E verifies following indicators at field;

- 1) Formation of VOs
- 2) Organisation of Households (0-18)
- 3) MIPs
- 4) IGG Beneficiaries
- 5) CIF Beneficiaries
- 6) CPI Beneficiaries
- 7) Record of VOs

These indicators are cross verified physically in the field and feedback is shared with the Team Leader and respective sectors as well. Whereas keeping in view the guidelines suggested by senior management and feedback by the monitoring sector, set the direction for the field teams.

In case the monitoring sector has to verify the IGG cases, usually it takes the MIPs and directly goes to the VO. After physically verifying the case, VO record is properly checked. Feed back is regularly communicated to the Team Leader and respective SMUs as well.

Furthermore the monitoring sector in PIU performs the following activities:

- Weekly review meetings (All Unit In charge and PIU Staff)
- Monthly Review at each Unit Level (PIU Team)
- Monthly Review at PIU Level (All Teams)
- Weekly meeting Minutes
- Daily, Monthly and Quarterly Progress report
- NFR & Case studies

Annex - 6

UCBPRP Community Physical Infrastructure Project Process

1: IDENTIFICATION

Community Organisation (CO) or (VO) will identify the need of Project. The VO will send the decision to the Social Organiser in the form of a resolution signed by all the members present in the meeting.

2: PRE-FEASIBILITY

In response the resolution received from the VO, the Project Team Leader will give the approval to carry out the feasibility study. Pre-feasibility includes the Social Survey and Technical Survey. An engineer will visit the proposed project site for the Estimation and Design. The engineer will submit a report to the Team Leader on the viability of the project.

The main features of the report shall include:

- Need of the community.
- Socio Economic set up of the community.
- Capacity of the community to implement and maintain the project.
- Technical viability of the projects.
- Benefits of the project.

3: PROJECT PREPARATION

On the basis of the report submitted by the engineer, the Team Leader will give the approval for carrying out the project preparation including, technical survey, design, estimates and feasibility proposal.

4: TECHNICAL SURVEY

Engineer will conduct the detailed survey of the project .VO will nominate the required number of members to assist Engineer during survey.

5: DESIGN AND ESTIMATES

After completing the survey the Engineer will design the project, prepare the drawings and cost estimates. Cost estimates should be based on the standard specification and prevailing market rates. Man-days of the skilled and unskilled labour will also be worked out by the prevailing market rates.

5: FEASIBILITY PROPOSAL

Engineer will submit the feasibility proposal along with his recommendations to the Manager for approval.

6: APPROVAL OF PROJECT

Authorized person will give the approval of the project.

7: PROJECT INITIATION

Upon receiving approval from Manager, the Engineer formally initiates the project. And make the following agreements prior the formal initiation.

8: TERMS OF PARTNERSHIP

UCBPRP - Analysis of Meetings Minutes

DCOs Meeting

Meeting held on 18th June, 2009 with DCO District Kashmore- Khandkot. This was second meeting of CEO and PIU Staff with DCO. The meeting also included all the EDOs of the district.

Analysis:

- Acknowledged efforts of team, challenging working area in tough district in reference to the law and order situation
- Recognised and expressed interest in meeting VST graduates of District Kashmore-Kandhkot
- Proposed some changes in reporting format
- Encouraged the hard work and struggles of the PIU female staff
- Offered services of the district government to PIU Team

Meeting held on 23rd March, 2009 with DCO Shikarpur. This was an orientation meeting with DCO. Team Leader and field teams participated.

Analysis:

- DCO showed his willingness to see the work of the project in field.
- DCO agreed to hold a general meeting where his team at district level and Taluka level would participate, in which Team Leader and PIU team should give a detailed presentation on the project

Analysis of Weekly Meetings

- Work plans of field staff at SMU offices: observed by PIU Staff that practice is being followed by SMU staff.
- List of Missing Villages PSC: MIS team is working to overcome this issue.
- Orientation Sessions during trainings: this decision is also followed by PIU Professionals and SMU in charges as well.
- **Installation of Banners for Publicity:** Banner displayed at prominent places of UCs, Villages and district as well.
- Role of SO in VO Trainings: decision is followed by SOs.
- Schedule of weekly meeting of SMU staff: is being implemented by unit in charges.
- Compositions of teams and their transfer: Teams are transferred and working in new areas.

Observation of Aziz Uqali.

- 1. Inavailability of CNIC of females of Khandkot district:
- PIU has contacted NADRA and decided to launch mobile camps in those areas. Focal persons from PIU assigned for the task of coordinating with NADRA
- 2. Lack of Publicity of Government of Sindh:
- decided that banners will be displaced.
- SMU Unit teams (including admin and MIS staff) will be responsible in promoting the mandate of Sindh Government.

- VO Account Opening & VO record: This target is achieved 100% in SMU Ghari Yaseen, Madeji & Kandhkot. In newly established units, process underway
- **VO Trainings:** Vocational Education Training Institute has been established for men and women. Enrollment of students 1,754 from district Kashmore and Shikarpur.
- **Documentation:** Documentation maintained at PIU, SMU level and also monitored the record of VO/CO's records.
- **Daily and weekly Progress:** Daily Progress is updated and submitted to higher authorities on regular base.
- **CIF:** CIF disbursements to VOs were satisfactory in first quarter but the process expedited in last quarter.
- **Regular field Visits:** All teams at PIU and field staff is visiting on a regular basis. Teams are facilitating at ground level.
- Field Issues were discussed

Monthly Progress Review Meetings:

- **Review of Progress Unit Wise:** Unit In charges presented their progress to all PIU Staff. SOs' presentation skills and confidence being built through presentations.
- Monthly Planning against targets prepared on the base of quarter targets of PC-1
